

# Hydraulic 2-Ram-Lift

Type: JAB TwinRam 35 AE-S2

Due to its full-fledged secondary stroke, the TwinRam 35 AE-S2 offers two independent lifts at only one workstation. This makes it suitable for all workshop demands. The unique drive-on bridge type „Essmann“ is designed for lifting the vehicle on the wheels. Combined with the 2-stage telescopic swing arms, the wheel-free lifting of the vehicle is possible. Therefore a TwinRam 35 AE-S2 is the first choice for the service reception area.

The great swivelling range of the arms allows the trouble-free lifting of light commercial vehicles, small trucks, vans and SUVs. As the „Essmann“ support is equipped with extremely flat spring-leaves (20 mm drive-on height only), a recessed installation is not necessary and even vehicles with sport-suspension kits can be lifted easily. The vehicle is automatically centered between the spring-leaves so that an additional roll-away precaution is not required.

This exceptional lift-combination offers the possibility to position the swing arms at the vehicle lifting points in an ergonomic working height.

## Technical Data

Type	TwinRam 35 AE-S2
Lifting capacity	3.500 kg
Ram distance	2.300 / 2.500 mm
Effective stroke	1.820 / 1.950 mm
Lifting time approx.	30 sec.
Electric motor	2 x 2 kW
Oil filling	2 x 10 ltr.

## JAB-Advantages:

- Full-fledged secondary stroke
- No interfering beams or columns underneath the vehicle
- Higher flexibility regarding workflow
- Less workstations and less working time required
- Optimal for sports cars with low clearance height
- Wheel-free lifting in „flying slice“
- Drive-on bridge Essmann hot dip galvanized as standard
- Best possible illumination conditions
- Environmental friendly through low oil quantity and use of bio-degradable hydraulic oils (upon request)
- Many accessories available for all demands
- Easy to maintain through best accessibility
- Highest quality and huge life span
- Advice, after-sales and maintenance - all through JAB
